Wall/Grid Gallery (jQuery Plugin)

A very customizable jQuery Plugin, which will allow you to add a grid gallery, that can be edited from a HTML, JSON or XML files. The gallery is completely resizable and is compatible with all browsers and devices (compatible with iOS & Android). If you like this plugin, feel free to rate it five stars at CodeCanyon in downloads section. If you encounter any problems please do not give a low rating but contact me first so I can help you.

How to use/install it

In sources/**index.html** you have an example

1. Copy the folder **DOPWallGridGallery** somewhere on your server (preferably in the same folder with the page you want to add the scroller to).

2. Add the following **CSS** and **JS** files in the **<head></head>** section of your website:
   ```
   <link rel="stylesheet" type="text/css" href="DOPWallGridGallery/assets/gui/css/jquery.jscrollpane.css" />
   <link rel="stylesheet" type="text/css" href="DOPWallGridGallery/assets/gui/css/jquery.dop.WallGridGallery.css" />
   <script type="text/JavaScript" src="https://ajax.googleapis.com/ajax/libs/jquery/1.7.2/jquery.min.js"></script>
   <script type="text/JavaScript" src="DOPWallGridGallery/assets/js/jquery.mousewheel.js"></script>
   <script type="text/JavaScript" src="DOPWallGridGallery/assets/js/jquery.jscrollpane.min.js"></script>
   <script type="text/JavaScript" src="DOPWallGridGallery/assets/js/jquery.dop.WallGridGallery.js"></script>
   ```

   Note: The files can be anywhere on your server or web. Just make sure that they are loaded by your web page.

3. Add the plugin to a container (HTML tag, class or id):

   Example: $("#galleryContainer").DOPWallGridGallery ();

   You can give to parameters **SettingsDataType (JSON, XML, HTML)**, **SettingsFilePath**, **ContentDataType(JSON, XML, HTML)** and **ContentFilePath**:

   Example:
   $("#galleryContainer").DOPThumbnailScroller({
           "SettingsDataType": "XML",
           "SettingsFilePath": "settings.xml",
           "ContentDataType": "XML",
           "ContentFilePath": "content.xml"
   });

   Note: If no parameters are given the default values will be set:
           "SettingsDataType": "JSON"
           "SettingsFilePath": "DOPThumbnailScroller/json/settings.json"
           "ContentDataType": "JSON"
           "ContentFilePath": "DOPThumbnailScroller/json/content.json"

How to customize it

You have a JSON example in **DOPWallGridGallery/json/settings.json** and a XML example in **DOPWallGridGallery/xml/settings.xml**. For HTML you add in the container a list with class Settings (<ul class="Settings">). View Example 2 for an example.

Settings descriptions

Width (value in pixels). Default value: 900. Set the width of the gallery.
Height (value in pixels). Default value: 384. Set the height of the gallery. If you set the value to 0 all thumbnails are going to be displayed.
BgColor (color hex code). Default value: f1f1f1. Set gallery background color.
BgAlpha (value from 0 to 100). Default value: 100. Set gallery background alpha.
NoLines (auto, number). Default value: 3. Set the number of lines for the grid.
NoColumns (auto, number). Default value: 4. Set the number of columns for the grid.
ImagesOrder (normal, random). Default value: normal. Set images order.
ResponsiveEnabled (true, false). Default value: true. Enable responsive layout.

ThumbnailsSpacing (value in pixels). Default value: 15. Set the space between thumbnails.
ThumbnailsPaddingTop (value in pixels). Default value: 0. Set the top padding for the thumbnails.
ThumbnailsPaddingRight (value in pixels). Default value: 0. Set the right padding for the thumbnails.
ThumbnailsPaddingBottom (value in pixels). Default value: 0. Set the bottom padding for the thumbnails.
ThumbnailsPaddingLeft (value in pixels). Default value: 0. Set the left padding for the thumbnails.
ThumbnailsNavigation (mouse, scroll). Default value: mouse. Set how you navigate through the thumbnails.
ThumbnailsScrollScrubColor (color hex code). Default value: 777777. Set the scroll scrub color.
ThumbnailsScrollBarColor (color hex code). Default value: e0e0e0. Set the scroll bar color.
ThumbnailsInfo (none, tooltip, label). Default value: none. Display a small info text on the thumbnails, a tooltip or a label on bottom.

ThumbnailLoader (path to image). Set the loader for the thumbnails.
ThumbnailWidth (the size in pixels). Default value: 200. Set the width of a thumbnail.
ThumbnailHeight (the size in pixels). Default value: 100. Set the height of a thumbnail.
ThumbnailAlpha (value from 0 to 100). Default value: 80. Set the transparancy of a thumbnail.
ThumbnailAlphaHover (value from 0 to 100). Default value: 100. Set the transparancy of a thumbnail when hover.
ThumbnailBgColor (color hex code). Default value: cccccc. Set the color of a thumbnail's background.
ThumbnailBgColorHover (color hex code). Default value: 000000. Set the color of a thumbnail's background when hover.
ThumbnailBorderSize (value in pixels). Default value: 0. Set the size of a thumbnail's border.
ThumbnailBorderColor (color hex code). Default value: cccccc. Set the color of a thumbnail's border.
ThumbnailBorderColorHover (color hex code). Default value: 000000. Set the color of a thumbnail's border when hover.
ThumbnailPaddingTop (value in pixels). Default value: 3. Set top padding value of a thumbnail.
ThumbnailPaddingRight (value in pixels). Default value: 3. Set right padding value of a thumbnail.
ThumbnailPaddingBottom (value in pixels). Default value: 3. Set bottom padding value of a thumbnail.
ThumbnailPaddingLeft (value in pixels). Default value: 3. Set left padding value of a thumbnail.

LightboxPosition (document, gallery). Default value: document. If the value is document the lightbox is displayed over the web page fitting in the browser's window, else the lightbox is displayed in the gallery's container.

LightboxWindowColor (color hex code). Default value: 000000. Set the color for the lightbox window.

LightboxWindowAlpha (value from 0 to 100). Default value: 80. Set the transparancy for the lightbox window.

LightboxLoader (path to image). Set the loader for the lightbox image.

LightboxBgColor (color hex code). Default value: 000000. Set the color for the lightbox background.

LightboxBgAlpha (value from 0 to 100). Default value: 100. Set the transparancy for the lightbox background.

LightboxMarginTop (value in pixels). Default value: 70. Set top margin value for the lightbox.

LightboxMarginRight (value in pixels). Default value: 70. Set right margin value for the lightbox.

LightboxMarginBottom (value in pixels). Default value: 70. Set bottom margin value for the lightbox.

LightboxMarginLeft (value in pixels). Default value: 70. Set top left value for the lightbox.

LightboxPaddingTop (value in pixels). Default value: 10. Set top padding value for the lightbox.

LightboxPaddingRight (value in pixels). Default value: 10. Set right padding value for the lightbox.

LightboxPaddingBottom (value in pixels). Default value: 10. Set bottom padding value for the lightbox.

LightboxPaddingLeft (value in pixels). Default value: 10. Set left padding value for the lightbox.

LightboxNavigationPrev (path to image). Upload the image for lightbox navigation's previous button.

LightboxNavigationPrevHover (path to image). Upload the image for lightbox navigation's previous hover button.

LightboxNavigationNext (path to image). Upload the image for lightbox navigation's next button.

LightboxNavigationNextHover (path to image). Upload the image for lightbox navigation's next hover button.

LightboxNavigationClose (path to image). Upload the image for lightbox navigation's close button.

LightboxNavigationCloseHover (path to image). Upload the image for lightbox navigation's close hover button.

CaptionHeight (value in pixels). Default value: 75. Set caption height.

CaptionTitleColor (color hex code). Default value: eeeeee. Set caption title color.

CaptionTextColor (color hex code). Default value: dddddd. Set caption text color.

CaptionScrollScrubColor (color hex code). Default value: 777777. Set scroll scrub color.

CaptionScrollBgColor (color hex code). Default value: e0e0e0. Set scroll background color.

SocialShareEnabled (true, false). Default value: true. Enable AddThis Social Share.

SocialShareLightbox (path to image). Upload the image for lightbox social share button.

TooltipBgColor (color hex code). Default value: ffffff. Set tooltip background color.

TooltipStrokeColor (color hex code). Default value: 000000. Set tooltip stroke color.

TooltipTextColor (color hex code). Default value: 000000. Set tooltip text color.

LabelPosition (bottom, top). Default value: bottom. Set label position.

LabelTextColor (color hex code). Default value: 000000. Set label text color.

LabelTextColorHover (color hex code). Default value: ffffff. Set label text hover color.

How to add content

You have a JSON example in **DOPWallGridGallery/json/content.json** and a XML example in **DOPWallGridGallery/xml/content.xml** . For HTML you add in the container a list with class Content (<ul class="Content">). View Example 2 for an example.

Content description

Image – Add path to image (mandatory).
Thumb – Add path to thumbnail (mandatory).
Title – Add caption title.
Caption – Add caption text.
Media – Add media (HTML, Flash, YouTube, Vimeo, …).
Link – Add a link to the thumbnail.
Target – The target the link opens in.

IMPORTANT: For Media make sure that all the code is in one html tag. Iframe embedding code will work :).

FAQ

1. **Why doesn't the gallery show in my website?**
   1. The plugin files aren't loaded on your page.
   2. If the gallery doesn't show it might be because there is a problem with the JavaScript in your website. If you can't identify the problem contact me with a link. I will identify the problem for you, but I will not fix the problems that aren't caused by this plugin.

2. **What I can do when nothing works?**
   Contact me :)

   Before I can offer support I will need to confirm your purchase.

   There are 2 ways to do this:
   1. Send me a Private Message from my Profile Page ... the right-bottom form. If you don't see it you need to Sign In into your Envato Account.
   2. Send me your Envato Username & Item Purchase Code that came with the Licence Certificate when you bought the item. You can get it from CodeCanyon -> Sign In into your Account -> Downloads -> Licence Certificate on the purchased item.

   Please add in your message a link were you use the item, admin and/or FTP log in info, or any other stuff that might be relevant.

   I will try to answer your questions in less than 48 hours. If you don't receive an answer in 48 hours please view my Profile Page for a reason.

PS: Don't forget to rate this item.
